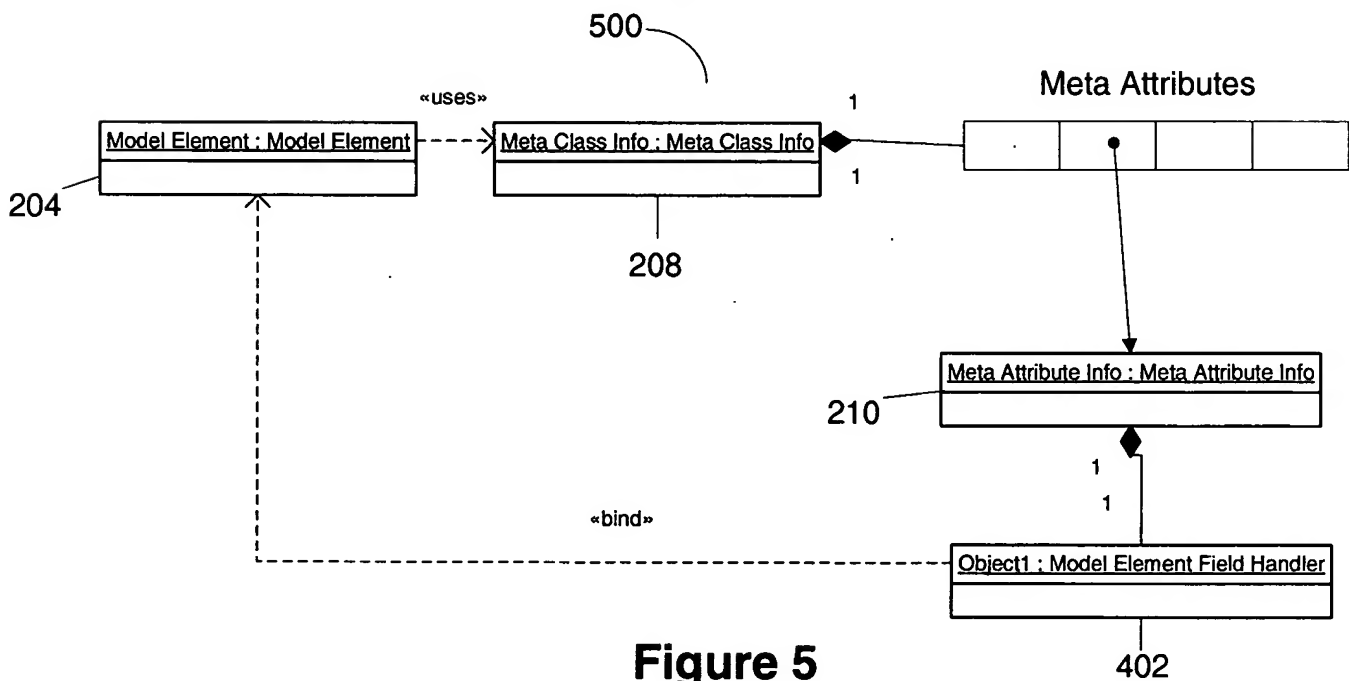

Figure 5

600

```
{  
    private int age;  
    public int Age  
    {  
        get  
        {  
            return age;  
        }  
        set  
        {  
            modelElementAgeFieldHanlder.SetFieldValue(this, value);  
        }  
    }  
}
```

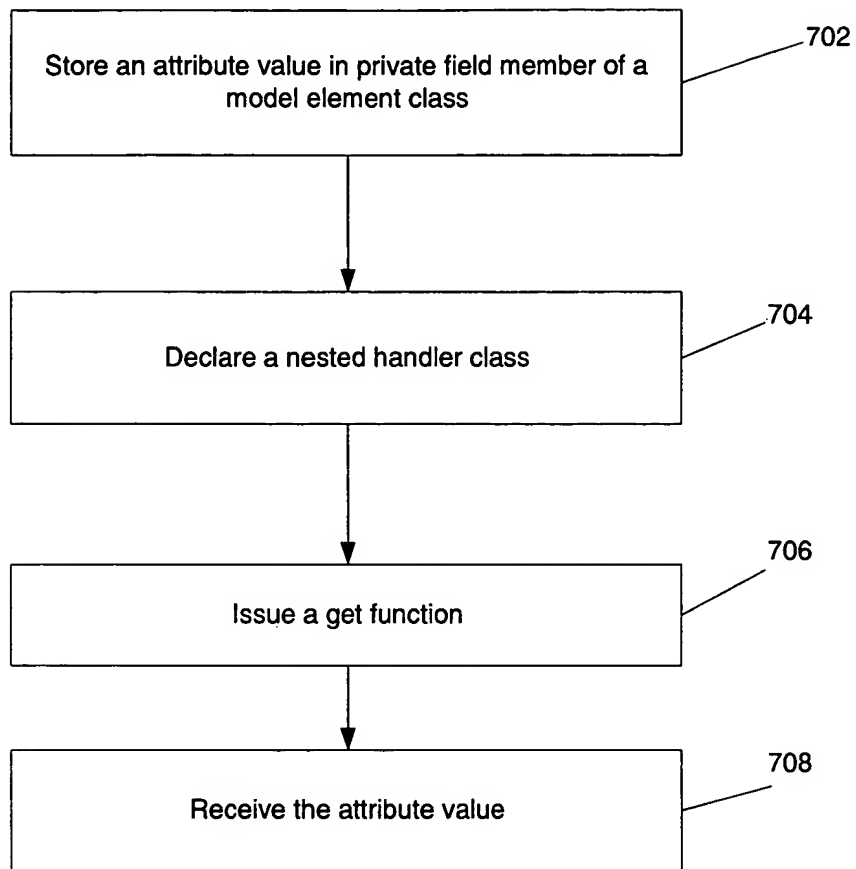

602

604

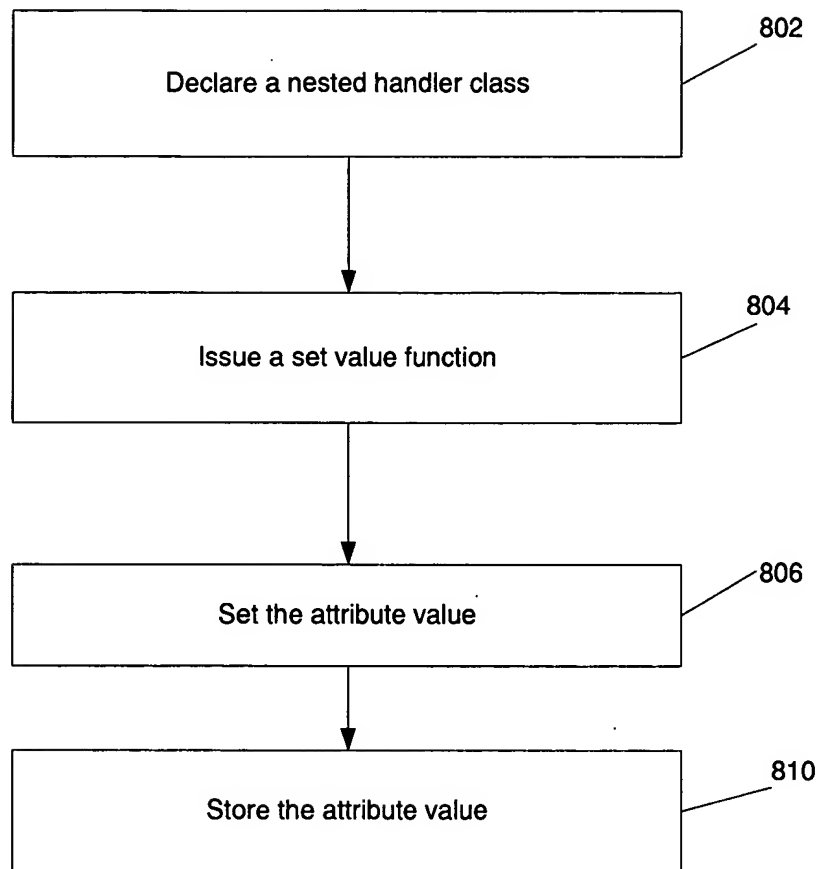

606

The diagram shows a code block for a class. A bracket labeled 600 spans the entire code block. A line labeled 602 points to the 'get' method. A line labeled 604 points to the 'return age;' statement. A line labeled 606 points to the 'modelElementAgeFieldHanlder.SetFieldValue(this, value);' statement.
